Small University. Big Thinking.

If you’re ready to unleash your potential for excellence, consider all the advantages that a small, smart university has to offer. We’re a primarily undergraduate university where helping students to realize their full potential is our first priority. Student success is directly related to quality teaching, and our A+ results in three prominent surveys indicate that these are areas of student satisfaction. Our goal is to provide a high quality, personalized learning experience – one student at a time.

Genevieve de Bruyn, this year’s Nipissing University Student Union (NUSU) President, comes to us from Renfrew, Ontario, and is currently in her 4th year of studies in the Bachelor of Arts (Honours) Sociology program with the Orientation to Teaching option.

Having always been certain that she wanted to teach, Genevieve came to Nipissing University because she knew several teachers who had obtained their teaching degree here and had spoken very highly of their experience. Since coming to Nipissing, she has immersed herself in student advocacy and has consistently been involved in student-oriented activities, while keeping her focus on a career in education and maintaining a significant level of volunteerism. Genevieve volunteers with Frontier College Students for Literacy, has been a Fresh Leader for two years and was voted Best Female Fresh Leader for September 2006. As well, she served as the Social Sciences Representative to NUSU in 06/07. Genevieve returns to her hometown each spring to do contract work at a local elementary school through a program called Tutors in the School, and volunteers regularly on university breaks.

As for advice for all future students, “I encourage every student to become involved; learning is about asking questions and understanding the world around you. It takes effort but it is always worth it,” says Genevieve.

One Student at a Time.
Small University. Big Guarantees.

Guaranteed Entrance Scholarships

No rocket science here. No application is required either. If you have the marks you’ll receive the scholarship. Check page 19 for more information on other scholarships, awards and bursaries.

Guaranteed Single Room in Residence

Residence is guaranteed to students admitted directly from high school. With modern single rooms for all, completely wired for high-speed Internet access, it’s no wonder Nipissing’s residences are rated as some of the best in the country.

Look at what Nipissing has to offer, and if you want to find out more, check out www.nipissingu.ca/prospectivestudents
Vicky Samuel is an exceptional example of one who has come from a diverse and tumultuous background and who has travelled from afar to attend Nipissing University. Along with her parents and three sisters, Vicky left Rwanda in 1994 and eventually settled in Malawi. While there, Vicky was able to complete her Grade 12 with excellent marks and applied to the World University Service of Canada (WUSC). WUSC submitted her name and programs of interest to WUSC-partnered universities. Nipissing saw a perfect candidate in Vicky and offered her acceptance into the Bachelor of Science in Nursing program. Vicky arrived as a refugee student in 2004.

Now in her third year of the program, Vicky is looking forward to being a Residence Don again this year and assisting other students with the transition from secondary school to university.

Of her experience she says, “I’m really enjoying Nipissing and Canada. All the people I’ve met have been very helpful and friendly. It has been reassuring for me to attend a university where I can get to know my professors and the other students.”

What is the Nipissing Advantage?

**Individual Attention and Research**

Students have an opportunity to work one-on-one with their professors. Many students conduct undergraduate research – almost unheard of at larger institutions.

**Innovative Programming**

Nipissing is committed to improving its facilities and implementing new technology to enhance its programs — whether in the $1.7 million dollar Central Analytical Facility, the Nursing Simulation Lab, the laptop-integrated Bachelor of Education program, or with adaptive technology used to assist students with learning challenges.

Nipissing is enthusiastic about developing programs and partnerships that increase civic and global involvement and that cultivate leadership skills. Apart from the many international exchange partnerships we enjoy, Biidaaban is a new community service-learning program that will see students partnering closely with community groups, allowing them to apply theories learned in class to real world situations. Nipissing’s partnership with the Toronto Star and Craig and Marc Kielburger, founders of Free the Children and Nipissing University honourary degree recipients, is another example of our commitment to educate students and encourage them to voice their opinions on social justice issues.

**High Employment Rate**

Nipissing boasts a 95.3% employment rate six months after graduation and a 98.4% employment rate two years after graduation, which is above the provincial average*. (Source: Government of Ontario’s 2005 performance indicators)

**Small Class Sizes**

Our average class has 34 students and a student to faculty ratio of 21:1.

**Safety**

Nipissing is considered one of the safest universities in Canada. We offer a campus walk program and security is available 24 hours a day.

**City Transit Pass**

Included in all full-time student incidental fees is a City of North Bay transit pass to make transportation a breeze.
North Bay Campus
Nipissing University is proud to be a primarily undergraduate university, offering a variety of degrees in Arts, Science and Education, and is committed to providing a safe and personalized student experience. The main campus is located in North Bay, Ontario, and is situated within a stunning 291 hectares of pristine Canadian Shield forest. With a plethora of lakes and forests at the doorstep, all students enjoy the natural beauty of our surroundings, while researchers in the environmental sciences benefit greatly from the university’s idyllic location and cutting-edge lab facilities. Nipissing University’s residences are rated the finest and most modern in Ontario. All first-year students are guaranteed a single room in residence. The university features four residence complexes and offers just over 1,000 beds.

MusKoka Campus
In August of 1996, Nipissing University opened a satellite campus in Bracebridge, Ontario. This year, the Muskoka campus is expanding and facilities will serve all of Muskoka as well as the outlying areas and will offer significant improvements for our students, from increased course selection to technologically advanced classrooms. Students have the opportunity to study full-time or part-time toward three different Arts and Science degrees; Child and Family Studies, Culture and the Arts or a 3-year liberal arts degree. Students can also opt to do more course work in a specific discipline, positioning themselves for further studies toward an Honours degree, which would be completed from our North Bay campus.

Brantford Campus
In September 2002, Nipissing University opened the Brantford Campus. Nipissing and Wilfrid Laurier universities offer a collaborative Concurrent Bachelor of Arts/Bachelor of Education program. You’ll earn a BA (Honours) in Contemporary Studies from Laurier and a BEd from Nipissing. All required BEd courses are delivered in Brantford. You may enroll in either the Primary/Junior (Junior Kindergarten through Grade 6) or Junior/Intermediate (Grades 4 through 10) division, and you’ll have your choice of placements in Public or Catholic schools (from eight boards within 40 km of Brantford) to practice teach.

For full details visit: www.nipissingu.ca/results
Derek Stacey has a lot to say about student scholarship, research and accessibility to education. This outstanding scholar, peer tutor, student grader, researcher, accomplished musician and ultimate Frisbee coach and competitor, graduated from Nipissing in June ‘06 having achieved both the Governor General’s Silver Medal and the President’s Gold Medal for attaining the highest academic standing within the Faculty of Arts and Science and the Bachelor of Business Administration program. Equally impressive, Derek was awarded one of the most prestigious honours when the Social Sciences and Humanities Research Council of Canada (SSHRC) granted him a $17,500.00 Canadian Graduate Scholarship to pursue his Master of Arts in Economics degree. He has since garnered an additional SSHRC fellowship to pursue his PhD. These accomplishments, Derek is quick to point out, were assisted by the availability and quality of Nipissing’s guaranteed entrance scholarships and the opportunities that smaller class sizes and easy access to professors provided.

“One of the things that attracted me to Nipissing”, says Derek, “was the scholarship program. Another perk was the opportunity, generally reserved for post-graduate students, to research alongside my professors. The experience has definitely been an advantage through the application process to a graduate program.”

Is Nipissing right for you?
You’ll feel it the moment you step on campus. Over 60% of our students come from out of town, which means most everyone is eager to cultivate relationships with other out-of-towners and North Bay students will be eager to show you around. The people here want you to succeed and they want you to enjoy yourself while doing it!

Our main campus has 4,689 full-time students and is located in North Bay, Ontario, a city of 56,000 people. It’s considered one of the safest places to live.

Although the name North Bay may give the impression that it’s distant, it is in fact, only a 3.5 hour drive from Toronto and 4 hours from Ottawa.

What can I study?
Nipissing University offers over 20 different majors in a variety of disciplines. You’ll benefit from the personal contact with your professors, the quality of teaching and the student services we have to support you.

If you’re interested in teaching, Nipissing’s Faculty of Education has been providing teacher education for over 95 years and is internationally renowned for the quality of its programs and its innovative laptop learning initiative. Nipissing University offers BA/ BEd and BSc/ BEd Concurrent Education programs or a one-year BEd program after completion of an undergraduate degree.

Nipissing also offers two unique opportunities called Orientation to Teaching (OTT) and Pre-Education for Physical and Health Education (PEP). If you are admitted to OTT (not applicable to Nursing or Physical and Health Education) or PEP (Physical and Health Education only) as part of your undergraduate degree and meet the requirement of graduating with a minimum overall average of 75% on all university courses, you are guaranteed a spot in the BEd program. This guarantee is offered for the year following graduation only.

For more information on Concurrent Education and Options for becoming a Teacher, please see Information for Students at www.nipissingu.ca/prospectivestudents.

Master of Education

Concurrent Education

The Faculty of Arts and Science, in conjunction with the Faculty of Education, offer a concurrent program leading to a Bachelor of Arts (Honours) degree and a Bachelor of Education degree or a Bachelor of Science (Honours) degree and a Bachelor of Education degree.

Orientation to Teaching

Thinking about a career in teaching? Consider Nipissing’s Orientation to Teaching (OTT). As an OTT student you will take teaching-specific courses as part of your undergraduate degree. OTT can be combined with any Nipissing degree, with the exception of Nursing and Physical and Health Education.

Pre-Education for Physical and Health Education

Thinking about a career as a Physical Education teacher? Consider Nipissing’s Pre-Education for Physical and Health Education (PEP). You will have the opportunity to apply for PEP at the end of first-year. As a PEP student you will take specific education-related courses as part of your Physical and Health Education degree.

*available at both North Bay campus and Brantford campus  **available at Muskoka campus only  ***majors also available with Concurrent Education
**Small University. Big Selection.**

**Undergraduate Programs**

**Biology and Environmental Biology and Technology**

You have an innate desire to learn about life in its many forms. Perhaps you’re fascinated with the world of organisms that live beneath the water, or the study of birds. You may be disturbed that so many of our plant and animal species are on the brink of extinction and you’re determined to change the way our world views conservation.

As a Biology student, you’ll learn from professors who are at the top of their field. You may even have the opportunity to conduct graduate-level research as an undergraduate, something unheard of in larger institutions. Canada Foundation for Innovation recently awarded three of our renowned professors with grants that have allowed us to develop state-of-the-art research facilities, including a central analytical facility, a fully-automated greenhouse, a confocal microscopy unit, and a genomics/gene expression laboratory. Research students graduating from our programs have the advantage of training in sophisticated contemporary biological techniques, which is reflected in their high success rate in obtaining prestigious national scholarships.

You’ll be part of a community that will do everything to help you succeed and we offer many support programs such as writing seminars, peer tutoring and mentor programs.

In first-year, you’ll be introduced to Biology, Chemistry, Technical Statistics and, in addition to your electives, you’ll have a choice between Environmental Science, Geology, Mathematics or Physics courses. Our students have gone on to graduate studies or successful careers in biology, research, medical school, wildlife management, forestry and consulting. For more information please visit www.nipissingu.ca/biology.

**Business, Administrative Studies or Economics**

You may dream of owning your own business or working in the exciting fields of accounting, economics, marketing, human resources or technology. The study of Business can take you to so many new and intriguing places. During your studies you will find yourself among an incredibly supportive group of people. Professors get to know who you are and will do everything possible to make sure you have the tools to succeed.

Student groups such as the Nipissing University Business Community (NUBC) will give you the opportunity to socialize with other students who have similar interests, interact with your professors outside of the classroom and make business contacts in the community and abroad.

In first-year, you will be introduced to five streams: Accounting, Economics, Human Resources Management, Marketing and Technology Management. After first-year, you can decide if you would like to specialize in one of the streams or take a more generalized approach to your studies. Consider an International Exchange in your third or fourth year.

Our students have gone on to graduate studies or to successful careers in...
education management, accounting, taxation, e-commerce, government, human resources, marketing, banking and international investment. For more information please visit www.nipissingu.ca/business.

**Child and Family Studies**

You want to make a positive difference in the lives of others. You believe that we all have a responsibility to our children and to our community. You may be interested in the nature of family systems, how communities function and how we all relate to each other globally. This degree integrates courses from Psychology, Social Welfare and Sociology and is offered through our Muskoka campus only, which is located in Bracebridge, Ontario.

Our students have gone on to work in areas such as child welfare, social services, counselling, community advocacy, social work, education and community mental health. For more information please visit www.nipissingu.ca/muskoka.

**Classical Studies**

You love wearing togas. Okay, perhaps that’s going a bit too far, but you do have a keen interest in ancient civilizations. You may want to find out more about how the ancient Greeks and Romans lived, what they believed in and the language they spoke. In first-year, you’ll be introduced to Ancient Literature, Latin, Religion, Military Traditions, Mythology, Philosophy, Art and Architecture, Social and Political Thought, and differing theories developed by various historians.

Our students have gone on to graduate studies, law school and pursued their interest in research, library or museum services, archeology, and education. For more information please visit www.nipissingu.ca/classicalstudies.

**Computer Science**

You sometimes dream in code, of creating the perfect robot, computer game or about the latest in artificial intelligence. Nipissing can provide you with a strong foundation in computer science theory and in applications such as artificial intelligence, robotics, graphics, networking and distributed systems, computer security and software engineering. You can tailor your degree to be more applied or theoretical and you’ll be supported by faculty who are genuinely interested in providing you with the skills to make your dreams a reality.

In first-year, you’ll take a number of courses including Digital Systems, Programming, Calculus, and Discrete Mathematics. Our students have gone on to graduate studies at renowned universities such as Harvard, have found employment in Silicon Valley or have pursued careers such as a system analyst, programmer, software analyst, software developer and programmer. For more information please visit www.nipissingu.ca/computerscience.

*Offered at the Muskoka Campus only*
You're interested in law and order. You're concerned about public safety or perhaps you're intrigued by forensic psychology, fraud, racial profiling, sentencing and wrongful convictions. You want to make our world a better place to live in.

Criminal Justice students complete core courses in Criminology, Law and Research Methods, along with specialized courses in one of four program streams: Policing, Corrections, Criminology or Administration and Social Policy. Nipissing University works collaboratively with Canadore College (located on-campus) for the Policing and Corrections streams and graduates of these streams will receive both an Honours BA degree and a college diploma (Police Foundations or Correctional Worker). When applying to this popular program, make sure you send in your Supplemental Application. See page 20 for details.

Our students have gone on to graduate studies, law school or to work for the RCMP, OPP, Ministry of Community Safety and Correctional Services, regional and municipal police forces and military police as police officers, crime analysts, research and policy analysts, correctional officers and probation officers. For more information please visit www.nipissingu.ca/criminaljustice.

*Offered at the Muskoka Campus only

Culture and the Arts*
You're a thinker. You enjoy observing life and like to study thought, ideas and culture. This program will broaden your understanding of social, political and cultural conditions in which thought and expression take shape. This degree is offered at the Muskoka Campus only. You'll study in the heart of Muskoka in Bracebridge, Ontario.

When you graduate you'll have the critical thinking skills required to go on to journalism, foreign service, business, research and education. For more information please visit www.nipissingu.ca/muskoka.

* Offered at the Muskoka Campus only
English Studies

You love literature in English – its stories, its songs, its language. You may be an aspiring actor, writer, teacher, scholar, journalist or poet. Whatever your aspirations, the individual attention you'll receive from your English Studies professors will help you to reach your goals.

In first-year, you'll take Introduction to English Studies, a unique course that is delivered collaboratively by at least two professors working in dialogue, along with a seminar instructor, to present course material in a lively, informative and accessible way. Small group discussion is important throughout the program. Over the course of your degree, you'll learn valuable research methods and literary skills through courses focusing on Literary History and Genre, Culture, Media and Language and Rhetoric.

Many of our graduates have continued their studies in the Faculty of Education or have gone on to successful careers in law, academia, journalism, theatre and library sciences. For more information please visit www.nipissingu.ca/english.

Fine Arts

You may look at the world differently than others and you want to express your point of view through art. Nipissing University’s Fine Arts program provides the essential mix between studio and academic training that will provide the tools to pursue a career in Fine Arts.

Our students have gone on to complete their Masters of Fine Arts and/or have become established artists. Many pursue careers in art history, communications, advertising, design, illustration, art direction or as an art critic. For more information please visit www.nipissingu.ca/finearts.
Gender Equality and Social Justice
You believe in basic human rights. You recognize that thinking about gender also means thinking about power. Understanding how power works in the worlds we build is one of the most important keys to redressing why some people seem to have more than others. Gender Equality and Social Justice at Nipissing is one of the most innovative programs in Canada and each one of our courses speaks to questions of justice.

In first-year, the program offers students a broad exposure to the historical and contemporary debates that underpin questions of gender equality and social justice. Students will learn about social movements such as civil rights, women’s rights, queer rights and environmental rights as well as some of the controversial debates surrounding global travel, reproductive rights, pornography and identity politics. Students may develop interests in critical studies of popular culture; the politics of resisting inequality through the law; the United Nations and Truth Commissions; transnational organizing for social justice; histories of colonization; feminist philosophies; postmodernism; and the intersections of race, class, ability, sex and gender.

In upper-year courses you will have the opportunity to concentrate your studies in one of three streams: Gender Relations, Women and Culture, and Human Rights and Social Justice. The program is highly interdisciplinary with immediate links to programs in Religions and Cultures and Philosophy and courses cross-listed in almost all the humanities and social science disciplines.

Our students have gone on to graduate studies as well as to successful careers in law, international development and research, communications, government, health, research and advocacy, media, and education. For more information please visit www.nipissingu.ca/gesj.

Geography
You may want to ensure that your generation leaves a strong and healthy environment for the next, or you may be interested in the rocks, trees and water that make up the Earth. Perhaps you’re intrigued by city grids from the window of an airplane or you’re always the designated navigator on road trips. The field of Geography is very diversified and at Nipissing you can choose between four degree programs; Geography, Environmental Geography, Geography of Regional Planning and International Development (GRID), and Environmental Science and Physical Geography. Also offered is a certificate in Geomatics as well as a certificate in Environmental Management. In first-year, you’ll be introduced to Human and Physical Geography. If you take Environmental Geography or Environmental Science and Physical Geography, you’ll also take an introductory course in Environmental Science. If you’re an Honours Geography student you’ll want to consider completing a Geomatics Certificate alongside your degree. You’ll cover additional skills that employers are looking for, such as surveying and mapping, the Global Positioning System (GPS), Remote Sensing, and the Geographic Information System (GIS).

If you are a GRID student you will take a variety of courses that prepare you for applied studies in Regional Development, Urban Planning and International Development. You may also be interested in the annual field trip.

Our students have gone on to graduate studies or successful careers as map editors, land surveyors, researchers, policy advisors, land use planners, conservation officers, and meteorologists. For more information please visit www.nipissingu.ca/geography.
History
You love stories from the past. You enjoy reading about our history and the events that have shaped our lives. You believe that we should never forget the past, so that we can avoid making mistakes in the future.

Our professors have expertise in North American, European, International, and Community and Oral History, and cover the past from ancient times to the day before yesterday. They like to work with students and are dedicated to teaching you the research and critical skills needed to succeed.

In first-year, you’ll begin with introductory courses in either Canadian History, World History or European History. In your upper years, you’ll examine history from a variety of perspectives including economic, social, intellectual, political, military and environmental angles. Our students have gone on to graduate studies, law school or successful careers in journalism, education, archival research, museum work, politics and government. For more information please visit www.nipissingu.ca/history.

Liberal Arts
You’re interested in many disciplines and would rather not focus on one major. Nipissing’s liberal arts program gives you maximum flexibility to study a range of disciplines, without having to focus on one in particular.

It emphasizes breadth rather than specialization and you can develop a program that is based on your specific interests and goals.

The majority of courses taken in this degree will be in the Humanities and Social Sciences, although you will be able to take courses in Business and Sciences as well. In first-year, you can choose from a very wide range of disciplines. Our students have gone on to careers in teaching, journalism, law, administration, public relations, theatre arts and Marketing. For more information please visit www.nipissingu.ca/liberalarts.
Liberal Science
If you’re interested in exposure to a range of scientific disciplines, Nipissing’s Liberal Science program provides a broad-based understanding of science. You will study the basic concepts and orientations of modern science and consider its role in today’s society. The program is general in nature.

In first-year, you’ll take introductory courses in a minimum of two science disciplines and at least two courses from Chemistry, Mathematics and Physics.

Our students have gone on to careers in teaching, library services, scientific journalism and pharmaceutical sales. For more information please visit www.nipissingu.ca/liberalscience.

Mathematics
You love Math. It’s almost like a second-language to you. Math is one of the few subjects that can transcend boundaries, opening up a number of opportunities to you as a Mathematics graduate. The four-year (Honours) degree allows you to tailor your program to your particular career interests and strengths. In this degree you’ll choose from three different streams: Pure Mathematics, Applied Mathematics, or Non-specialized. Nipissing’s Mathematics professors are known for their dedication to their students. There is also a Math Drop-in Centre available to assist you with any math problems that you may have.

In your first two years, you’ll take courses in Calculus, Linear Algebra, Discrete Mathematics and Probability and Statistics. In upper years, you’ll select from a variety of courses such as Analysis, Algebra, Differential Equations, Combinatorics & Graph Theory, Topology, Mathematical Modeling and Mathematics of Finance. Mathematics students have a great opportunity to complete research as an undergraduate. In fact, it’s a requirement in fourth-year.

Did you know that a degree in math provides you with a variety of career choices? Our students have gone on to graduate studies, law school or successful careers in teaching, statistics, economics, accounting, finance, insurance and as an actuary or analyst. For more information please visit www.nipissingu.ca/mathematics.
**Native Studies**

The Medicine Wheel is a traditional native holistic approach with which to gain insight and to guide life, and is a central template to Native worldview. It is also the impetus for the various unique courses offered in this program. Students will be offered valuable learning opportunities and information to create life-enhancing and transformative opportunities for the individual and their future directions in both career and life experiences.

Some of the courses in the Native Studies Program include: Introduction to Native Studies; Native Philosophy; Native Kinships With Environment; Native Creativity and the Arts; and Concepts of Wellness in First Nations Communities. Students can major or minor in Native Studies and have gone on to a wide palette of successful careers in areas such as government, social services, community health, advocacy, teaching, law, fine arts; and environmental management. For more information please visit www.nipissingu.ca/nativestudies.

**Nursing**

The number of heart-felt thanks that patients give nurses everyday is immeasurable. Most of us will be admitted to a hospital during our lifetime. You may remember getting your tonsils out, having an operation, or perhaps you were with a loved one in the last stages of their life.

Nipissing’s Bachelor of Science in Nursing (BScN) degree, in collaboration with Canadore College, offers a program designed to equip you with the clinical skills and professional abilities necessary to meet the growing needs of health care.

In first-year, you’ll be exposed to a broad-based curriculum that covers the physical, emotional, social and spiritual aspects of health. Most importantly, you’ll experience nursing right away in our unique job shadowing experience, where you will work side-by-side with nurses in practice and in our state-of-the-art Simulation Lab, where you will demonstrate your skills in simulated patient case scenarios. In addition, those interested will have an opportunity before graduation to experience an international Nursing Placement.

It’s a wonderful privilege in life to be a nurse. Nurses make an invaluable contribution to the health and well-being of individuals, families and communities. As the needs of health care increase, Nipissing feels it’s even more important that we graduate nurses who are professionally prepared for a technology-enhanced, fast-paced hospital environment, research opportunities and/or graduate studies. With a Nursing degree you can work in public health, community and hospital nursing, health education, case management or become a professor or researcher. For more information please visit www.nipissingu.ca/nursing.
Philosophy
The Greek word philosophia means love of wisdom. What is knowledge? What is the meaning of life? What is real? What is right and wrong? Why do we consider something beautiful or ugly? As a Philosophy student you’ll have lively debates and discussions around these age-old questions and how they relate to life today including areas such as film, gender issues and existentialism.

The study of philosophy will help you learn to think clearly and abstractly, and to discuss the possibility and nature of moral standards. In first-year, students are introduced to Philosophy and take elective courses. If you are taking an Honours degree, it is important to note that you will combine majors, adding to the breadth of your degree.

Studying Philosophy will prepare you well for law school, graduate studies and careers in teaching, journalism, administration, government, and social work. For more information please visit www.nipissingu.ca/philosophy.

Physical and Health Education
You are interested in recent research that reports the decline in physical fitness in the general population of North America and you’re curious about the attention to food and nutrition levels being encouraged by the Canadian Government and agencies like the World Health Organization. You believe in the importance of health promotion, disease prevention and human performance, and you want to investigate how physical activity affects physical, mental and social well-being.

Students in first-year will study core theoretical courses including: Introduction to Physical Education, Motor Development, Health Concepts in Physical Education, Leadership, and Dimensions of Physical Activity. There is also a practical physical education component in each year of the program, which offers students an opportunity to engage in a variety of sports and physical activities in the gymnasium, on the field, or within community facilities such as the YMCA for aquatic classes and the dance studio at Widdifield Secondary School. In second, third and fourth-year a unique community leadership placement will allow students to become sports and fitness leaders within North Bay. A variety of courses for upper year students include: Human Anatomy and Physiology, Nutrition, Wellness and Physical Activity Promotion, Exercise Physiology, Biomechanics, Coaching, Injury Prevention and Care, Fitness Assessment and Prescription, Health and Exercise Psychology and Contemporary Health Issues.

Interested in becoming a Physical Education teacher? Students have the opportunity to apply for the Pre-Education for Physical and Health Education (PEP) option at the end of first-year. PEP students take specific education related courses throughout their degree and will be guaranteed a place in the one year BEd program after graduation.*

Students may go on to careers in sports management, kinesiology, fitness assessment and promotion, athletic therapy or coaching. Many will decide to go on to graduate studies and pursue a teaching degree or sports medicine. For more information please visit www.nipissingu.ca/physicalandhealtheducation.

Political Science
You’re fascinated by the characteristics, assets and inner workings of the ideal state and the study of the processes, principles, and structure of government. As well, you want to explore the organization of various political institutions and the relationship to

* Guarantee applicable to PEP students who graduate with a minimum 75% cumulative average on all university courses. This guarantee is offered for the year following graduation only.
political and moral philosophy, political economy, foreign policy, history and other disciplines concerned with the social sciences.

As a Political Science student you’ll examine Canadian politics and local government, great political questions and the origins of international relations and foreign policy. The approach to your studies will include a range of economic, sociological, psychological and historical modes of analysis.

Political Science students may go on to careers as government advisors, policy makers, or even run for office themselves. Others may further their studies in law or journalism. For more information please visit www.nipissingu.ca/politicalscience.

Psychology
The Study of Psychology allows us to explain and predict human behaviour. Unlocking the mysteries of the human brain is a challenging and exciting field of study. At Nipissing University, you will study with professors whose research includes aging and cognition, the psychology of art, work stress, autism, abnormal child sexual behaviour, psychological measurement and behavioural neuroscience. You will have an opportunity to conduct independent research as an undergraduate, work in productive labs and participate in courses that have a service learning component. In upper years, you may have the opportunity to become a Teaching or Research Assistant. These hands-on experiences will give you a significant advantage when pursuing graduate studies.

Students can pursue either a Bachelor of Arts or a Bachelor of Science degree in Psychology. In first-year, students will take the introductory course in psychology and other elective courses that are of personal interest. Science majors may also choose from courses such as Biology, Calculus, Chemistry or Physics to enhance their degree. In second year students will be able to study human behaviour by taking courses such as Early and Late Childhood or Adult Development, Cognitive Psychology, the Psychology of Work, Social Psychology, Sports or Health Psychology. Other students may choose to include courses in their degree dealing with clinical areas such Psychopathology, Counselling, Tests and Measurement, or Childhood Disorders. Students can study animal behaviour, using their findings to determine laws of behaviour that apply to all organisms and to formulate theories about how humans behave and think. All students will have the opportunity to develop skills in the area of research design and statistics.

An exceptionally high number of our graduates go on to world-class graduate programs, teaching or research careers. For more information please visit www.nipissingu.ca/psychology.

Religions and Cultures
You feel it is impossible to fully understand our contemporary world without understanding the part religion has played in its political, social and
artistic development. The program in Religions and Cultures uses an interdisciplinary and non-confessional approach to study the world’s religious traditions. Anthropological, historical, philosophical, psychological and literary-critical methods are all used to broaden our knowledge and appreciation of religion in the ancient and modern world.

In first-year, students will be introduced to the teachings and history of the world’s religious traditions. In upper year classes, more specific examination of how religious thought and practice inform cultural identities will be the focus. Courses such as “Death and Immortality,” “Religion and Violence” and “Sacred Cinema” are just a few examples of what is offered in this dynamic program where the interplay between religion and culture is critically explored. In depth study of particular religious traditions will coincide with investigation into the influence of religion on contemporary ethics and politics as well as the role of religion in the construction of gender and its presentation in the media.

Students graduating from this program may go on to graduate studies, pursue work in the area of cultural affairs and development, or consider a career in teaching or government. For more information please visit www.nipissingu.ca/religionsandcultures.

Social Welfare
You’re an advocate for change. You believe in second chances and you want to empower and enrich the lives of others. As a Social Welfare student, you’ll build on social justice work that has been done in areas such as poverty, women’s rights, health care, education, unemployment and Aboriginal rights. You will review social welfare concepts and the history of Social Welfare in Canada. This course also includes a 40-hour volunteer placement, which provides you with an opportunity to experience first-hand how a social agency works.

In first-year, you’ll examine the social, economic and political context of how societies work and the role that social welfare has in our society. Our students secure positions in social work, government, counselling, residential centres, social planning, advocacy groups, administration and self-help groups. For more information please visit www.nipissingu.ca/socialwelfare.

Sociology
You often wonder how shifts in society will affect us. Day-care, for example, is a common part of life today, but was almost unheard of 20 years ago. Are day-care children more independent as adults because of their experience, and has it shaped the world we know today? In our not-so-distant past we looked after the aged in our homes. As our population ages will we see a change in attitudes toward the elderly? Considering the age of civilization, computers are a relatively new phenomenon to our world. Are computers creating an anti-social society?

As a Sociology student you’ll examine these shifts and the ways in which social structures and institutions such as class, family, community, and power influence society. You’ll also explore how social problems such as crime and abuse affect society.

In upper years, you’ll have the opportunity to complete undergraduate research. This unique experience will provide you with a distinct advantage after you graduate.

Our students have gone on to graduate studies or successful careers in government, health care, law school, corrections, research, business and teaching. For more information please visit www.nipissingu.ca/sociology.
Teaching Options

Our history of offering education programs extends well over 95 years and we are known in Canada as a leader in teacher education. We were one of the first to implement a laptop computer program and we continue to lead in this area with using technologies such as Smartboard. If you’re interested in our teaching programs, you have four options to choose from:

1. **Nipissing’s Orientation to Teaching (OTT) or Pre-Education for Physical and Health Education (PEP) and the one-year consecutive Bachelor of Education (BEd) degree.**

   You will take teaching-specific courses throughout your undergraduate degree (General or Honours) and you’ll be guaranteed a place in the one year BEd program after graduation*. OTT is not applicable to Nursing and Physical and Health Education.

2. **Concurrent Education, North Bay Campus**

   Each year of your undergraduate degree studies (majors in Computer Science, English, Geography, History, Math or Psychology) includes Education courses. You graduate in 5 years with both a BA (Honours) or BSc (Honours) degree and a BEd degree.

3. **Concurrent Education, Brantford Campus**

   You will take education courses throughout your undergraduate Contemporary Studies degree and graduate in 5 years with a BA (Honours) degree from Wilfrid Laurier and a BEd degree from Nipissing University. Apply directly to Wilfrid Laurier University.

4. **The one-year consecutive BEd degree upon completion of an undergraduate degree.**

   You can apply to the Faculty of Education after you achieve either an Honours or General undergraduate degree from Nipissing University, or another recognized university.

*Guarantee applicable to students who graduate with a minimum 75% cumulative average on all university courses. This guarantee is offered for the year following graduation only.

For a complete comparison of all four options please visit www.nipissingu.ca/prospectivestudents. All routes meet the requirements of the Ontario College of Teachers for the Certificate of Qualification. For OTT and Concurrent Education you’ll need to include a supplemental application. Please see page 20 for details.

Teaching and Technology

Nipissing offers you the ITeach Laptop Learning program.

Being a leader in education technology means that you’ll benefit from added Information Technology (IT) skills that employers are seeking.

Depending on the route you have chosen, during the last two years of Concurrent Education and in the one-year Bachelor of Education students are required to purchase a laptop computer from the university. The laptop will be provided to you with the latest education software already installed such as the curriculum unit planner, computerized report cards, educational CD-ROMs and Ministry of Ontario software.
Ian Wassink, from Walkerton, Ontario, made his decision to come to Nipissing based on the reputation of the Faculty of Education and information he received through a liaison visit at his high school. He was attracted to the unique advantages offered in a small university setting where classes are small, professor to student interaction is high, residences have the top rating in Canada, and where a generous entrance scholarship program is in place.

Currently a third-year Bachelor of Arts (Honours) History student with Orientation to Teaching, Ian made a conscious effort to achieve academic success while maintaining noteworthy extra-curricular involvement and on-campus employment. When he arrived at Nipissing, this Carl Sanders Scholarship recipient gained employment on the security staff at The Wall (the on-campus pub), accepted the volunteer position of VP Social for the Residence and Inter-Residence Council, where he earned the Residence Upper Year Student of the Year award, and served as Residence Representative on the Student Council (NUSU). Ian occasionally writes for The Hibou (student newspaper on campus), and most recently, was elected to the position of NUSU Vice-President Internal.

“I like to do the things other university students do for fun, like spend time with friends and join clubs. I heartily recommend that all students get engaged in their university community,” says Ian.

**Small University. Big Life.**

Our residences are the finest accommodations you’ll find in the province and single rooms are guaranteed to all first-year students coming directly from secondary school. Residence life is about meeting new people and exploring new ideas. It’s about studying, socializing, living independently and making your own choices.

**Single Rooms in Residence**
If you’re a current high school student who receives full-time admission by May 26, 2008, and you meet the residence application and deposit deadline, you are guaranteed a single room in residence. Students in residence have access to coin-operated laundry rooms, common areas and lounges. All residences are smoke-free environments. Every room has a telephone and is wired for the Internet.

**Suite Style Residences**
There are three suite styled residences. Founders House and Chancellors House, located on the lower campus and Governor’s House on the main campus. Lower campus is a short walk or a three-minute bus ride to your classes. Each fully-furnished suite accommodates four students and features four single bedrooms, a kitchen with fridge and stove, a living room and two full bathrooms.

**Activities**
There is a genuine sense of belonging that naturally develops in residence. Students are provided the opportunity for many great experiences. The residence staff, in conjunction with Residents’ Councils, organizes a variety of fun events to suit all interests such as potluck suppers, skating parties, the winter carnival, athletic events, movie nights and coffee houses.

**One Student at a Time.**
Determine the Cost
Maintaining a budget throughout your stay at university will help ensure that you achieve your goals and have less stress doing it.

Tuition Fees for Full-time Undergraduate Studies (2007-2008)

Canadian Citizens and Permanent Residents
BBA and Computer Science ................................. $4,605.00
Concurrent Education (Year 1) ............................. $4,393.00
All Other Programs ......................................... $4,315.00

International Students
Undergraduate Programs .................................... $10,500.00

Compulsory Incidental Fees
Student Incidental Fees ..................................... $926.25
(includes a City of North Bay transit pass, health services, student services, student insurance plan, e-mail/Internet access, student ID card, student government, student centre and athletic complex fees)

Optional Fees
Residence fees ............................................. $4,232 - $4,736.00
On-campus parking ......................................... $90 - $210.00
Locker rental .................................................. $20.00

Optional meal plans are available to residence and non-residence students for $200, $750 or $1,500; or, choose a personal plan starting at a minimum of $25.

This information is provided for guidance only. Fees are subject to change from year to year.

Scholarships, Bursaries and Awards

Check out our guaranteed entrance scholarships outlined on page 1. Last year, nearly 80% of our students received an entrance scholarship. Scholarship averages are calculated using the best six final 4U/4M marks completed as of June 30, 2008. Your final grades can make a big difference! Secondary school applicants from outside Ontario are eligible for entrance scholarships and may contact the Liaison Office for information. Applicants who apply by May 1, 2008, will be automatically considered for entrance scholarships.

For a complete list of scholarships, please visit www.nipissingu.ca/financialaid
Tara Schuck graduated in June ’07, from the Bachelor of Arts and Science (Honours) in Criminal Justice program, Criminology stream. A top-notch student from Kemptville, Tara visited the campuses of her top three university choices and found her home away from home at Nipissing. And, it’s a decision she doesn’t regret.

“The people within the North Bay and Nipissing University communities were so friendly, encouraging, and inviting; I knew I wouldn’t be just a number and I could become involved in various school activities, as well as many community events,” says Tara, who has a remarkable academic record and an equally laudable history of volunteerism. With an 85% average, she has achieved both the Queen Elizabeth Aiming for the Top Scholarship and a Carl Sanders Scholarship for all 4 years of her undergraduate degree, has garnered two Nipissing University Leadership awards and received the Nipissing University Alumni Association Criminal Justice Award (2006). Tara was an International Student Mentor, the varsity Ministry Director at Greenwood Baptist Church, a delegate at the 1st Conservative Party of Canada Policy Convention in Montreal, and Vice-president of the Criminal Justice Student Association. Most recently, Tara scored in the 89th percentile on the LSAT exam and has been accepted to pursue a Law degree at Queen’s University.

Applying to Study Full-time

Secondary School Students
Ontario secondary school students will apply through the Ontario Universities’ Application Centre (OUAC) 101 application process.

Students attending Canadian secondary schools outside Ontario will apply through the Ontario Universities’ Application Centre (OUAC) 105D application process.

For admissions consideration to a Nipissing degree program with Orientation to Teaching (OTT), Concurrent Education or the Honours Bachelor of Arts degree in Criminal Justice, applications must be received via the Ontario Universities’ Application Centre (OUAC) and the completed supplemental applications must be submitted to the Office of the Registrar at Nipissing by February 22, 2008.

Applying to Study Part-time
Applicants to part-time university study apply directly to Nipissing University using the Nipissing part-time application form found at www.nipissingu.ca/registrar or contact the Liaison Office at: liaison@nipissingu.ca to request a copy.

Supplemental Applications
Criminal Justice, OTT and Concurrent Education
Supplemental application forms will be automatically mailed to Criminal Justice, Concurrent Education and OTT applicants. They can also be downloaded at: www.nipissingu.ca/Registrar. Applications must be received via the OUAC and completed supplemental applications must be submitted to the Office of the Registrar at Nipissing by February 22, 2008, in order to be considered.
Admission Requirements

Canadian Secondary School Applicants

Applying to your program of interest at Nipissing is simple – there are no hidden formulas. A minimum average of 75% and a supplemental application (Personal Statement of Experience) is required for consideration for admission to the Criminal Justice, Concurrent Education and Orientation to Teaching (OTT) programs. A minimum average of 72% is required for consideration for admission to the Business program.

A minimum average of 70% is required for consideration for admission to all other programs. Averages for all programs are based on the best six final 4U/4M or equivalent courses including all required courses. Please refer to the admissions chart for specific course requirements. Refer to the chart below for the number of courses included in the admissions average computation.

### Admission Requirements

#### Canadian Secondary School Applicants

**Alberta**
- Five Gr. 12 courses numbered 30 or 31

**British Columbia**
- Five Gr. 12 courses including four provincially examinable courses (courses with percentage grades not letter grades)

**Manitoba**
- Five academic Gr. 12 courses at the 40 level or the former 30 level

**New Brunswick**
- Five academic Gr. 12 courses numbered 121 or 122 (courses numbered 120 may be considered)

**Newfoundland**
- Six two-credit academic courses at level 3

**Nova Scotia**
- Five Gr. 12 courses at the 541 level (441 level courses may be considered)

**Nunavut/Northwest Territories**
- Five Gr. 12 courses numbered 30 or 31

**Ontario**
- Combination of six 4U/4M courses

**Prince Edward Island**
- Five Gr. 12 courses numbered 611 or 621

**Quebec**
- One year of CEGEP completed with a minimum of 12 academic subjects

**Saskatchewan**
- Five Gr. 12 courses numbered 30 or 30A

**Yukon**
- Four Gr. 12 examinable courses (courses with percentage grades not letter grades)

* Candidates from Quebec who have completed the two-year CEGEP program will be considered for admission with advanced standing. Students who have completed the three-year professional program in a CEGEP with a cumulative average of “B” or better will be considered for admission with advanced standing, to a maximum of 30 credits.

### International Baccalaureate

Applicants who have successfully completed the International Baccalaureate (IB) diploma with at least six subjects, including three at the higher level, with a minimum final grade total of 24, will be considered for admission. Advanced standing, to a maximum of 18 credits, may be granted for courses completed at the higher level with a grade of 5 or higher.

### Advanced Placement

Applicants who have completed Advanced Placement (AP) courses are encouraged to submit their examination results. Official AP score reports must be sent directly to Nipissing University. Advanced standing will be granted for most AP courses completed with a grade of 4 or higher, to a maximum of 18 credits.

---

**Sense of Personal Safety/Security**

93% of Nipissing University undergraduate students strongly agree/agree that professors encouraged students to participate in class discussions.

**Supportive Campus Environment**

Nipissing students gave higher ratings with respect to a Supportive Campus Environment when compared to Ontario universities.

---

For full details visit: [www.nipissingu.ca/results](http://www.nipissingu.ca/results)
Admission Requirements (continued)

International Applicants
Applicants will be expected to show proof of English proficiency and must have completed courses in certain academic disciplines depending upon the degree program applied to. For guidance, please refer to the admissions chart at the back of the book.

International applicants do not typically qualify for transfer credit for previously completed post-secondary courses at non-Canadian institutions. Part-time university study is not available to international students. International secondary school applicants are eligible for Nipissing’s Entrance Scholarships starting at $1,250 for “A” average students.

Applicants from the United States
Applicants graduating with a “B” average from Grade 12 at an accredited secondary school and presenting high scores in SAT Reasoning or ACT examinations including the Writing Test component and at least two SAT Subject Tests or AP/IB subjects appropriate to their proposed area of study are normally eligible for admission. Scores below 500 in any part of the SAT Reasoning or SAT Subject Tests are not acceptable. Please refer to the admissions chart at the back of the book for specific subject requirements. Other applicants from the U.S. must have completed a minimum of 30 semester credits (45 quarter credits) at an accredited post-secondary institution (U.S. applicants who have completed more than 30 semester credits at an accredited post-secondary institution will be assessed on an individual basis for transfer credit/advanced standing).

Applicants from Great Britain and Other Countries with GCE Equivalents
Applicants must present the General Certificate of Education (GCE) with satisfactory standing in at least five academic subjects, two of which must be at the advanced level or satisfactory standing in at least four academic subjects, three of which must be at the advanced level.

Other International Applicants
Applicants possessing the requirements necessary for admission to a recognized university in their home country will normally be eligible for admissions consideration.

Proof of Proficiency in English
All student visa applicants from areas where the language of instruction is not English are required to supply proof of proficiency in English.

International applicants studying in Canada on a student visa authorization who have attended an Ontario secondary school, or a Nipissing University approved school, full-time for at least the past three years, are exempt. Permanent resident applicants whose first language is not English may also be required to provide proof of proficiency in English. Permanent resident applicants who have lived at least three years in Canada, or in a predominantly English-speaking country, are exempt.

Acceptable proof of English proficiency is the Test of English as a Foreign Language (TOEFL) with a minimum
score of 550 PBT, 213 CBT, including a TWE score of 5.0, or 80 iBT (minimum 20 in each section); the Michigan English Language Assessment Battery (MELAB) with a minimum score of 90%; the Canadian Assessment of English Language (CAEL) with a minimum score of 60; or the International English Language Testing System (IELTS) with a minimum overall band score of 6.0 (with no band less than 6). Applicants should note the Nipissing University TOEFL code is #3614.

Applicants with Post-Secondary Studies
Applicants who have attended a college or university may be eligible for admission to select programs and possibly receive transfer credit for completed studies. Official transcripts from all institutions attended are required for admission consideration. Prerequisite subjects must be met for specific programs as outlined in the Admission Chart.

University Applicants
Applicants in good standing at recognized universities may apply to Nipissing University. Transfer credit is usually awarded for university courses previously completed (at an accredited university) with “C” grades or higher.

Dependant on the program applied to, transfer credit is not normally granted for practical or clinical courses taken in specific areas such as Engineering, Physical and Health Education, Dance, etc. Students enrolled at other universities may apply to take Nipissing University courses for transfer credit to their home university via a Letter of Permission. Letter of Permission applicants apply directly to Nipissing University.

College Applicants
Applicants from Colleges who have completed a recognized diploma program with a minimum 70% overall average are normally eligible for admission consideration to select programs. Some programs are restricted to applicants with higher averages. Applicants who have not completed a diploma program must present a minimum of one full year of a recognized college diploma program with an overall 70% average in order to be considered.

Mature Students
Applicants who are not admissible to Nipissing University based on previous academic results may be considered for admission on probation to select programs as a Mature Student. Full academic disclosure is required and official transcripts must be submitted. Mature students admitted to Nipissing will be restricted to a reduced course load to begin their studies. Mature student applicants must be 21 years of age or older at the start of the term being applied to, and must have been away from formal academic education for at least the past two years.

For further admissions information and forms be sure to visit www.nipissingu.ca/registrar
