Topical Module: Learning with Technology

Developed in partnership with EDUCAUSE, these questions examine the role of technology in student learning, focusing on usage, contribution to learning, and perceptions of institutional support. This module complements questions on the core survey about learning with peers, quality of interactions with others, and institutional emphasis on academic support. (Complementary FSSE set available.)

We want to know how technology relates to your learning. By “technology,” we mean any or all of the following:

- Hardware (desktop computer, laptop, tablet, smartphone, etc.)
- Software (word processing, spreadsheet, presentation, graphics, statistical, etc.)
- Online tools (communications, social networking, etc.)
- Websites (for courses, library resources, etc.)

1. During the current school year, how much has your use of technology contributed to the following:

   - Your understanding of course materials and ideas
   - Demonstrating your understanding of course content
   - Learning, studying, or completing coursework on your own
   - Learning, studying, or completing coursework with other students
   - Distracting you from completing your coursework

2. During the current school year, how much have your courses improved your understanding and use of technology?

3. During the current school year, about how often have you used the following technologies in your courses?

4. During the current school year, about how often have you used technology to communicate with the following people?

5. How much does your institution emphasize the following?
